

Applied Mathematics 221

Project Milestone 1: Proposal

David Freed and Sam Green

February 24, 2016

1 Problem Statement

In this project, we intend to investigate the predictive properties of Twitter data as it relates to outcomes in Basketball games in the NBA and NCAA.

2 Collaboration

This project will be completed by David Freed and Sam Green. We intend to work collaboratively on all aspects of the project and will divide specific implementation tasks based on our previous experience as they arise.
